WORK EXPERIENCE

Research Assistant
Concordia University

Montreal, QC
Sep 2023 – Mar 2025

- Conducted research on Natural Language Query (NLQ) with Retrieval-Augmented Generation (RAG), improving query understanding in egocentric video datasets.
- Developed and implemented domain adaptation techniques for object detection in security X-ray images, applying the ALDI (Align and Distill) method to enhance model robustness.
- Designed and optimized deep learning models using PyTorch, PyTorch Lightning, and Compute Canada resources for large-scale experiments.
- Analyzed and benchmarked multiple approaches for cross-domain object detection, improving model generalization under domain shifts.

Machine Learning Intern
The University of British Columbia

Vancouver, BC
Nov 2024 – Feb 2025

- Implementing the state-of-the-art models in PyTorch and PyTorch Lightning, such as OmniMotion, Real NLP, Betrayed by Attention, and NeRF on Google Cloud Platform and Compute Canada.
- Reviewed and discussed approximately 5-7 research papers per week, analyzing various approaches to improve the performance and accuracy of previous methodologies.
- Enhanced model accuracy for detecting occluded objects by around 7 %.

Zanzan University of Medical Science
Data Reserach Analyst

Zanzan, IR
Jul 2022 | Jan 2023

- Conducted research on Machine Learning and Electroencephalogram signals
- Utilized Welch, Convolution, and Fourier transform, to compute connectivity, power, and amplitude
- Applied low-data techniques, such as data augmentation and transfer learning, to prevent underfitting and improve model performance on limited datasets.
