WORK EXPERIENCE

Vita Detection <i>Research Intern</i>	<i>Montreal, CA</i> Apr 2025 - Aug 2025
<ul style="list-style-type: none">Developed and implemented domain adaptation techniques for object detection in security X-ray images, applying the Align and Distill (ALDI) method to enhance model robustness.Designed and optimized deep learning models using PyTorch Lightning on Amazon Web Services (AWS) and Compute Canada for large-scale experiments.Analyzed and benchmarked multiple approaches for cross-domain object detection, improving model generalization under domain shifts.	
The University of British Columbia <i>Research Intern</i>	<i>Vancouver, CA</i> Nov 2024 - Feb 2025
<ul style="list-style-type: none">Implemented the state-of-the-art models including OmniMotion, real-valued non-volume preserving (Real NVP), Betrayed by Attention, and Neural Radiance Fields on Google Cloud Platform (GCP) and Compute Canada.Reviewed and discussed approximately 5-7 research papers per week, analyzing various approaches to improve the performance and accuracy of previous methodologies.Enhanced model accuracy for detecting occluded objects by around 7%.	
Zanjan University of Medical Sciences <i>Data Research Analyst</i>	<i>Zanjan, IR</i> Jul 2022 - Jan 2023
<ul style="list-style-type: none">Conducted research on machine learning and electroencephalogram signals.Utilized Welch, Convolution, and Fourier transform to compute connectivity, power, and amplitude.Applied low-data techniques, such as data augmentation and transfer learning, to prevent underfitting and improve model performance on limited datasets.
